dev-aditya-design.github.io/aditya-portfolio-v2/

PROFILE

Aspiring AI Developer and Software Engineer focused on building practical, user-oriented digital products. Hands-on with modern AI, machine learning, automation and web development workflows, with a build-first approach to learning. Comfortable taking ideas from planning and interface design through development, version control and deployment. Interested in software roles and independent client work involving intelligent applications, automation and modern web experiences.

TECHNICAL SKILLS

AI & Machine Learning	Artificial Intelligence, Machine Learning, Generative AI, AI Agents
Automation	n8n, AI Automation, Workflow Automation
Programming & Web	Python, JavaScript, HTML, CSS, Web Development
Software & DevOps	Git, GitHub, DevOps Fundamentals, VS Code, Claude Code
Data & CS	Data Science, Data Structures & Algorithms (DSA), Problem Solving
Design	UI/UX, Responsive Design, Animated Website Design

WORK

- Build and deploy responsive web experiences with attention to usability, clean interfaces and modern presentation.
- Apply AI, machine learning and automation concepts to practical prototypes and workflow solutions.
- Use Git and GitHub for source control, project organization and deployment workflows.
- Create websites, AI-assisted solutions, automation workflows and technical prototypes for real-world requirements.

CAPABILITIES

Product Building	Translate an idea into a structured, working digital solution and improve it through iteration.
AI-Assisted Development	Use modern AI development tools for research, coding, debugging and workflow design while maintaining implementation ownership.
Client-Focused Thinking	Focus on clear requirements, practical outcomes, responsive interfaces and maintainable delivery.

EDUCATION

Bachelor of Computer Applications (BCA)	2024 - 2027
IFTM University, Moradabad	Expected Graduation

CAREER OBJECTIVE

Seeking opportunities to contribute to real-world AI and software projects, strengthen production-level engineering skills and grow through collaborative development. Open to internships, entry-level roles and client engagements where I can create useful software, intelligent workflows and polished digital experiences while continuing to deepen my technical expertise.
