

ADITYA

SOFTWARE ENGINEER | WEB DEVELOPER

Email: dev.adi.xo@gmail.com | WhatsApp: +91 9548027373
Portfolio: aditya-in.netlify.app | GitHub: github.com/dev-aditya-design | LinkedIn: linkedin.com/in/dev-adi-xo

PROFILE

BCA student and aspiring software professional focused on practical software engineering and modern web development. Hands-on with Python, JavaScript, React, FastAPI, APIs, Git/GitHub and responsive interface development, with additional exposure to AI-assisted development and workflow automation. Comfortable taking an idea from planning and interface design through development, testing, version control and deployment. Open to internships, freelance client work and remote collaborations.

TECHNICAL SKILLS

Programming	Python, JavaScript, TypeScript, HTML5, CSS3
Web Development	React, Vite, FastAPI, Responsive Web Design, REST APIs
Software & Tools	Git, GitHub, VS Code, Streamlit, Vercel, Render
AI & Automation	Generative AI, Gemini AI, AI Agents, NLP Fundamentals, Workflow Automation, n8n
Data & Foundations	Machine Learning Fundamentals, Scikit-learn, DSA, Problem Solving, Software Engineering
Design	UI/UX Fundamentals, Mobile-first Design, Clean Interface Design

CAPABILITIES

Product Building	Translate requirements and ideas into structured, usable digital solutions with a clear implementation path.
Web Development	Build responsive, modern websites and interfaces focused on usability, presentation and mobile compatibility.
Software Development	Develop practical applications, integrate APIs, organize code and use version control for maintainable delivery.
AI-Assisted Development	Use modern AI development tools responsibly for research, coding support, debugging, prototyping and workflow design.
Deployment & Delivery	Prepare and deploy web/software work using GitHub and modern hosting platforms, then validate the production experience.

WORK

- Web & Software Development:** Build responsive websites, client-facing demos and practical software applications with attention to clean interfaces, usability and reliable functionality.
- Development Workflow:** Work from requirements and planning through implementation, testing, Git/GitHub version control and deployment.
- API & Automation:** Integrate APIs and apply AI/automation concepts where they improve a workflow or solve a practical problem.
- Client-Focused Delivery:** Focus on clear communication, realistic scope, mobile-friendly experiences and polished presentation suitable for real business use.

EDUCATION

Bachelor of Computer Applications (BCA) IFTM University, Moradabad	2024 - 2027 Expected Graduation
--	---

PROFESSIONAL OBJECTIVE

Seeking software engineering or web development opportunities where I can contribute to real-world products, strengthen production-level engineering skills and grow through practical collaboration. Also available for freelance website and software development work for clients who need clean, responsive and useful digital solutions.
